power unit features

- 6. air bypasses motor**
vacuumed air is exhausted around motor not through it to prolong motor life
- 7. exclusive isolation gasket**
unique design cradles motor assuring a lifetime seal while reducing noise and vibration
- 8. easy-to-install mounting bracket**
mounts flush to single stud on wall
- 9. steel hood canopy**
protects and keeps motor from overheating while sealing out dust and water
- 10. motor ventilation louvers**
positioned for safety and prolonged motor life
- 11. top motor thermal seal**
prevents heated motor air from mixing with cooling intake air to prolong motor life
- 12. spring-mounted motor**
three hold-down springs help maintain continuous seal and suction
