## quiet home

**SMART engineers have combined deep-cleaning power with a patented noise reduction package (a standard feature on the +/quiet models) to create a central vacuum system that provides virtually silent operation! it's so quiet, you can enjoy the freedom of vacuuming when others are studying, resting or sleeping nearby — or even in the same room.**

**SMART sound-absorbing materials and a unique patented sound-off muffler reduce noise levels without reducing power. it's a smart solution for many families.**
